

## REMARKS

Claims 16-18, 20 and 21 remain pending in this application. Claims 16, 20 and 21 are in independent form. Claims 4 and 7-15 were previously withdrawn. The remaining Claims 1-3, 5, 6 and 19 have been canceled.

Claims 16 and 20 have been amended to recite all the limitations of their respective parent Claims 1 and 19, and to correct the indefiniteness noted by the Examiner. Claims 16-18 and 20 have been found allowable subject to the correction of the indefiniteness.

Added Claim 21 is essentially similar to Claim 16 minus the recitation of the flag, and the open mesh nature of the material which are not thought necessary to establish patentability.

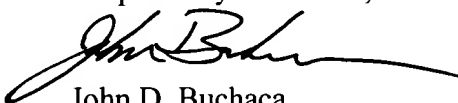

Accordingly, applicant submits that the now pending claims are allowable.

All the pending claims are addressed to the embodiment of the invention illustrated in original Figures 8-11.

Applicant has deleted from the specification and drawing, all material related to non-elected and non-claimed features in order to streamline the application and avoid unnecessary costs.

In view of which, an early allowance of this application is earnestly solicited.

Respectfully submitted,

John D. Buchaca
